INFORMATION TECHNOLOGY RESOURCES

The Office of Computing and Information Services (OCIS) is responsible for the management and support of computing, networking, and information technology services at Dalton State College. The services provided by OCIS include management and support of:

- Academic and administrative computing
- Local and wide area networking
- Microcomputer hardware and software applications
- Student computer labs
- Internet access

OCIS also provides assistance to executive management in the establishment of policies and procedures governing the access, use, and control of Dalton State College's information technology resources. With the ultimate goal of helping our students become successful, OCIS seeks to empower students, faculty, and staff by providing them quality service and access to the information technology tools they need.

The appropriate use of these resources is governed by the College's "Appropriate Use Policy": https://roadrunner.daltonstate.edu/skins/userfiles/files/Appropriate-Use-Policy.pdf

In particular, faculty members are reminded that the use of any college information technology resources for personal business or profit is a violation of state law.

OCIS Support Issues

If you need tech support for issues such as computer, software, printer, etc. please email servicedesk@daltonstate.edu.
