PURPOSE OF THE SURVEY

The Graduation Rate Survey (GRS), component of the Integrated Postsecondary Education Data System, collects data on completion or graduation rates and transfer-out rates of full-time, first-time certificate or degree-seeking undergraduate students. This survey will provide a new indicator in the National Center for Education Statistics' (NCES) ongoing effort to report on the condition of postsecondary education in the United States.

These data will also help institutions satisfy the requirements of the Student Right-to-Know legislation. According to the Student Assistance General Provisions (Sec. 668.41, 668.46, 668.49), institutions that offer athletically-related student aid are required to report graduation and transfer-out rates to the Secretary, U.S. Department of Education. In addition, other institutions that participate in any student financial assistance program under Title IV of the Higher Education Act of 1965, as amended, are required to disclose graduation rates to students and prospective students.

This survey is being conducted in compliance with the Center's mission "to collect, analyze, and disseminate statistics and other information related to education in the United States..." (P.L. 103-382, National Education Statistics Act of 1994, Sec. 404(a)).

USES OF THE DATA

These data will provide comparable graduation rate statistics for all postsecondary institutions in the nation. The data will also provide much needed information to researchers as an institutional outcome measure and it will offer insight into the relationship between the changing demographics of college-going cohorts within different types of institutions. The information collected in this form can also be used by institutions to partially satisfy the final regulations regarding the Student Right-to-Know Act.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number of this information collection is 1850-0582. The time required to complete this information collection is estimated to average 23.0 hours per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. **If you have any comments concerning the accuracy of the time estimate or suggestions for improving this form, please write to:** U.S. Department of Education, Information Management Team, Washington, DC 20202-4652. **If you have comments or concerns regarding the status of your individual submission of this form write directly to:**

**National Center for Education Statistics/IPEDS
555 New Jersey Avenue, NW
Washington, D.C. 20208-5652**

The definitions and instructions for compiling GRS data have been designed to minimize comparability problems. However, postsecondary education institutions differ widely among themselves. As a result of these differences, comparisons of data provided by individual institutions may be misleading unless accompanied by additional information about the institution.

DO NOT RETURN INSTRUCTIONS
